

## Optifit Tips

# Optifit Tips and SafetySpace™ Filter Tips

## The perfect match for your pipette

In liquid handling, pipetting results are not dependent on the pipette or the tip alone, but a combination of these and the comfort of the user. Our Optifit Tips and SafetySpace Filter Tips are designed and manufactured as a perfect fit for our pipettes, enabling maximum accuracy, precision and ergonomics. The unique Optiload mechanism of our pipettes allows tip attachment and loading with reduced force, but with complete sealing. These tips' universal design also secures compatibility with the pipettes of most other manufacturers.

Manufacturing the tips in our own production facility allows us to maintain the highest quality and purity standards, by selecting the best plastic materials and controlling the manufacturing process from beginning to end. Our quality management system follows not only ISO 9001 and ISO 14001, but also ISO 13485. Tip production also abides by the ISO 14644-1 standard, in order to fulfil ISO Class 8 cleanroom conditions for secured tip purity.

## ISO 8 Clean Room manufacturing

### Contamination free tips

To avoid contamination from human contact, we have automated the entire tip manufacturing process. Pure virgin polypropylene (PP) plastic is automatically fed from silos into molding machines. Molding machines and robots located in isolated clean cells load the tips automatically into tip trays and packaging. HEPA filters and higher air pressure are applied for purity within the cell. All Biohit Single Tray tip racks and Single Refill Packs are individually and automatically packed in air-tight plastic, in order to rule out any danger of contamination.

Additionally, our highly experienced and trained personnel are equipped with specially designed clothing, masks, hair nets and gloves, in order to further diminish contamination risks.

An independent laboratory checks each Single Tray and Refill Pack tip lot for RNase, DNase and endotoxins. Lot-specific purity certificates can be downloaded from [www.biohit.com/tipquality](http://www.biohit.com/tipquality).

## Features and benefits

### Best fit – highest possible accuracy

- Perfect fitting and sealing with Biohit pipettes secure the highest possible accuracy and precision
- Compatible with Optiload feature in Biohit Picus, eLINE, mLINE and Proline Plus pipettes enabling ergonomic and light tip attachment and ejection
- Color-coding of the tip trays allows easy matching with a suitable color-coded Biohit pipette
- Compatible with most other pipette makes (see compatibility with other manufacturers' pipettes at [www.biohit.com](http://www.biohit.com))

### Large variety of packaging options available:

- Single Tray racks
- Refill Towers
- Single Refill Packs
- Bulk in box

### Premium quality and purity

- Strict quality standards, ISO 9001 and ISO 13485, followed from R&D to production and delivery
- Manufactured in ISO 8 classified clean room conditions
- DNase, RNase and endotoxin free manufacturing process:
  - Single Trays and Refill Packs certified pure by lot number
- Pre-sterilized tips are e-beam irradiated
- All tip packages, including individual racks, are lot numbered for full traceability
- The highest quality virgin polypropylene used as raw material

# SafetySpace€ Filter Tips

## 100% sample delivery for better accuracy

SafetySpace Filter Tips leave more space between the sample and the filter than conventional filter tips. This allows pipetting any type of liquid or using any pipetting technique without the risk of the precious sample wetting the filter. In turn, this secures 100% sample recovery and greater accuracy.

### This feature is particularly useful in the following applications

- pipetting foaming liquids such as buffers and proteins
- pipetting solvents
- multiple dispensing functions of electronic pipettes
- reverse pipetting

The Filter Tips are made of virgin polypropylene and feature filter (PE) barriers, in order to prevent aerosol and liquid contamination. This helps protect against the risk of cross-contamination and reduces the pipette's maintenance requirements. The filter is made of polyethylene without "self-sealing" additives to avoid any interference with the sample and results.

SafetySpace Filter Tips are available in multiple volumes from 10 µl to 1200 µl and are packed in color-coded Single Tray racks. They are certified DNase, RNase and endotoxin-free and are e-beam pre-sterilized. Lot-specific purity certificates can be downloaded from [www.biohit.com](http://www.biohit.com).

### The SafetySpace™ Filter Tips are ideal for

- molecular biology
- microbiology
- cell culture applications
- radioactive work

## Packaging options

### SafetySpace™ Filter Tips

#### Single Tray racks

- Ten racks of 96 tips
- Covers a large range of tip volumes from 10 µl to 1200 µl
- Trays and racks are fully autoclavable at 121°C for 20 minutes

### Optifit Tips

#### Single Tray racks - for safer laboratory work

- Ten racks of 96 tips
- Covers a large range of tip volumes from 10 µl to 5 ml
- Fully autoclavable at 121°C for 20 minutes

Bulk in Box

### Optifit Tips

#### Refill Towers

- Space-saving with 10x96 tips in one tower.
- Covers the most used tip sizes: 10 µl, 200 µl and 350 µl
- Trays and tips are fully autoclavable at 121°C for 20 minutes

#### Bulk in Box

- Covers a large range of tip volumes from 10 µl to 10 ml
- Tips are fully autoclavable at 121°C for 20 minutes

### Single Refill Packs

- 10, 15 or 20 trays of 96 tips depending on tip volume
- Covers a large range of tip volumes from 10 µl to 1200 µl
- Trays and tips are fully autoclavable at 121°C for 20 minutes
